Safety Informations

Use the Easy PLug only for the use for which it was designed, any other application not mentioned in this manual may cause irreparable damage.

Do not attempt to dismantle the Easy PLug, due to the fact, that it does not contain parts that can be repaired by the user. Repairs must be carried out exclusively at assistance centres by qualified personnel. If damaged, the power lead is to be replaced by the manufacturer or by a service centre or in any event by a similar qualified person in order to prevent all risks.

We decline any responsibility for damage to objects and persons resulting from tampering with the Easy PLug.

Connect only original **AQUATRONICA** accessories, or those approved by it, to the Easy PLug. The use of non-approved accessories may provoke damage, fire, electric shocks or lesions to people.

Position Easy PLug out of the reach of children to avoid the danger of electrical shocks. The guarantee does not cover faults provoked by the use of non-approved materials.

The Easy PLug **is not waterproof**. Therefore, do not expose it to direct contact with liquids. Do not use outdoor.

Do not use inflammable cleaning liquids that may come into contact with electric parts and provoke fire.

Disposal of electric and electronic parts

Pursuant to Article 13 of Legislative Decree No. 151 of 25 July 2005, "Implementation of **Directives 2002/95/CE, 2002/96/CE and 2003/108/CE, regarding the reduction in use of dangerous substances in electrical and electronic equipment, as well as waste disposal**"

Products bearing the barred dustbin symbol must be disposed of separately from other waste.

The user must therefore dispose of the product in question at suitable recycling centers for electronic and electro-technical waste, or he/she must turn over the used product to the retailer when buying a new equivalent product, on a one-to-one basis. Separate waste collection allows used equipment to be recycled, treated and disposed of without negative consequences for the environment and health, and it allows the materials in the equipment to be recycled. Illegal dumping of the product by the user entails the administrative sanctions stated in Legislative Decree No. 22/1997 (Article 50 et seq of Legislative Decree No. 22/1997).

Separate collection of used products and packaging allows materials to be recycled and used again. Reuse of recycled materials helps prevent environmental pollution and reduces the demand for raw materials.

Local regulations may provide for the separate collection of household appliances at municipal waste sites or retailers when a new product is purchased.

CONNECTION DIAGRAM EASY PLUG

WARNING

The Multitester must be up to date in Firmware version 2.0 or later so that the Easy Plug accessory will work. Contact the Aquatronica technical assistance office to learn how to update the Multitester.

Easy Plug Function

The "Easy Plug" power unit is designed to be able to command the activation and deactivation of devices connected to it (e.g. heaters, coolers, CO₂ valves, etc.) depending on the values read by the sensors present.

The conditions under which the outputs are commanded can be set in the "Programs" menu of the sensors connected to the "Multitester" control unit (please see the relevant paragraph in the sensors instruction booklet).

After defining the activation/deactivation state (ON/OFF) of the OUTA and OUTB outputs, it is possible to see the icons relative to this programming on the main screen, regardless of whether or not Easy Plug is present (the Easy Plug connection is not, in fact, the plug and play type).

Declaration of conformity

DECLARATION OF CONFORMITY

Standard of reference ISD/IEC Guide 22 and EN 45014

Number of conformity: 004-2007/E

Name of the manufacturer: **Aquatronica division of A.E.B. srl**
Address: via dell'Industria, 20
Corte Tegge
42025 Cavriago (RE) Italy

DECLARES THAT THE ELECTRONIC UNITS

Name of the product: **Power unit**
Code: **ACQ012** (6 shuko plugs + I/O)
ACQ012 AUS (6 australian plugs + I/O)
ACQ012 F (6 french plugs + I/O)
ACQ012 UK (6 english plugs + I/O)
ACQ012 ZA (6 South Africa plugs + I/O)
ACQ013 (4 shuko plugs + 4 F plugs + I/O)
ACQ013 CH (8 swiss plugs + I/O)
ACQ005 (2 shuko plugs)

ARE IN COMPLIANCE WITH THE FOLLOWING PRODUCT SPECIFICATIONS:

FIELD	Directive	Description	References	Test Result
EMC	89/336/EEC	EMC directive	Official Journal of the European Union L139 May 23 1989	applied
LVD	73/23/EEC	Low voltage directive	Official Journal of the European Union L077 March 26 1973	applied

THEREFORE THEY ARE IN COMPLIANCE WITH THE REQUISITES OF THE CE MARK

The equipment was checked in a typical working configuration

Place of issue: Cavriago (RE) Italy

Date of issue: 08/21/2007

The A.E.B. srl legal representative
Paterlini Ivan

Specification

Input Voltage	230VAC - 50Hz
Output Voltage	230VAC - 50Hz
Maximum Power	3000W (16Amax)
